The author should revise your manuscript according the reviewer's comments as follows, and submit the revised manuscript as your final paper to us by stipulated date.

Recommendation to Editors (☒)					
	Strongly Reject	Reject	Marginally Accept	Accept with revisions	Strong Accept
Recommendation					☒
Expertise: The reviewer should explain your rating by discussing the strengths and weaknesses of the submission, contributions, and the potential impacts of the paper. Include suggestions for improvement and publication alternatives, if appropriate. Be thorough. Be fair. Be courteous. Your evaluation will be forwarded to the authors during the rebuttal period.					
Comments: <p>This paper has followed the general rules of a standard conference paper. Proper organization and writing was shown in the paper with clear figures and with adequate references. The paper is clear, concise and well written. The authors have done a very nice in introducing the importance of this research, describing the methodology, highlighting the findings, and offering a solid conclusion. The authors also suggest possible directions for further studies beyond the work that has been completed in this manuscript in the conclusions section. It could be told the author have done plenty of background research for the paper.</p>
